EMPLOYMENT

Web Developer   **Freelance**   **Spring – Summer 2015**

www.tedpaints.com
- Installed a CMS (WordPress) to build a simple website for displaying/selling client's art.
- Implemented CSS media queries for mobile responsiveness.
- User Experience focused site design.

JJBertram.github.io
- A github page to host personal information, resume, github and githup project pages.
- Familiarized myself with linux (Ubuntu 14.04) and the command line.
- Learned and used git/github on all projects for version control.
- Learned and used the Bootstrap framework for all projects.
- Learned and used GIMP for all image manipulation.

Technical Assistant   **www.FirstPageSage.com**   **Summer – Winter 2014**

- Content manager for most of our clients (edited images, media, text, newsletter templates, etc).
- Created page mock-ups and revisions using Photoshop.
- Fixed SEO errors (using GA, WMT, and MOZ tools) and tracked web traffic analysis in Google Docs.
- Purchased, placed, and tracked text-link ads to boost client Google page rank.
- UX research into ad placement, click and bounce rates, time spent on page etc.

Web Developer, Intern   **www.Jolkona.org**   **Summer 2013 – Summer 2014**

- Built event pages from mock-ups using Bootstrap, HTML5, CSS3.
- Worked with team of interns to modularize large projects into manageable short-term goals .
- Learned a lot about UX and design (flat) by working with a team of professional volunteers.
